Kosher products

COURT OF THE CHIEF RABBI
BETH DIN, LONDON

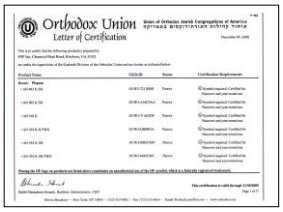
KOSHER CERTIFICATE

Upon request from its customers, SNF can produce some products with a Kosher approval. Specific production and cleaning procedures are therefore implemented in order to adhere to the requirements of the Kosher regulations. If required, some raw materials or ingredients are substituted by a Kosher approved equivalent.

All these measures are to be made prior to any productions. It is therefore necessary to know the Kosher requirement right from the taking of the order. Our customers are therefore asked to clearly specify this on the order form by adding a **K** after the SNF product description.

Examples: AN 934 SEP K
AN 934 VHM K

The product thus identified is manufactured accounting for all the special features related to Kosher and tracking from the taking of the order to the packaging is thus ensured. All Kosher products are characterized by marking stating on the logo the London Beth Din logo which is our certifying organisation.



Orthodox Union
Letter of Certification

Without this marking, the Kosher approval is not guaranteed. Furthermore, a Kosher approval is not possible for an already manufactured product (for instance a product in stock on a customer's premises) even if it is listed on our certificate as it would not have been produced in compliance with our Kosher procedures.

The list of products likely to be produced with a Kosher approval is provided on a certificate issued by London Beth Din which is available on request. In the event where a product is not featured on this list, we can contact a Beth Din Rabbi to examine the possibility of producing it with a Kosher approval.

An extra charge of 10% on the sales price is applied to account for the requirements relating to the Kosher certification.
